METROLOGY LABORATORY

We have a calibration laboratory in which we evaluate the accuracy and precision of the different measurement and generation equipment in the magnitudes of pressure, temperature and torsional torque; for the installation, maintenance, adjustment and calibration service of industrial instrumentation for measuring and simulating control loops.

We have extensive experience in maintenance and adjustment to Pressure and vacuum relief (safety and relief) valves operated spring-loaded, piloted, deadlifts, balanced, conventional, validating the results obtained in our laboratory of assay for PSV'S.

METROLOGY LABORATORY

“Hydrostatic and pneumatic” Leak Test Service under the guidelines, API598, API6D, ASMEB31.3-2010, personal certificate issued by the ASNT as Level I and II in tests of hydrostatic and pneumatic leakage, equipment of the most recognized (Haskel high pressure pumps, Barton plotters, manometers, Psv's, manifolds, etc.) certified before ema.

Non-destructive testing service; visual inspection (VT), Penetrating Liquids (PT), Magnetic Particles (MT), Radiography, for inspection of welds.
